

BX260

CASSETTE FOLDING ARM AWNING

SYDNEY SUNSCREENS
AN OUTDOOR REVOLUTION

Tested to 20,000 movements

Low profile

Attention to function & form

Optional Sun and Wind Sensor

Features Include

The BX260 Series are compact and relatively flat cassette awnings with its own unique contemporary design. Attention to technical details ensures years of trouble free operation.

The extremely low profile of the cassette ensures excellent integration with the facade of the building.

The BX260 has an aluminium extruded casing with strong cast aluminium end covers which completely encloses the fabric and arm mechanisms providing protection against dirt and grime etc.

The Arms: Extruded aluminium powder coated.

The Hinges: High pressure cast aluminium alloy. Hinge on durable slide bearings of sintered bronze with PTFE sliding layer. Thermally treated.

Springs and Steel cables: Zinc plated high quality spring steel. Grease impregnated Zinc plated steel cables ensure an even division of power.

The Shoulder: Extruded aluminium powder coated. Angle range from 10° to 40°.

Design ensures against flapping and dropping of arms.

Sizes:
Minimum - 2 metre in one part with two arms.
Maximum - 6 metre in one part with two arms.
- 7 metre in one part with three arms.
- 12 metre in 2 parts with four arms.

Quality: 5 year guarantee. You can therefore expect that only the best materials were used and a high level of importance placed on providing the perfect finish.

Operation: The BX260 Series can be equipped with electrical operation, using a tubular motor. For the ultimate in comfort an automatic wind-sun sensor regulates the awning automatically, depending on the light intensity and the wind speed. Manual operation using a crank and gearbox is also available.
